

# BEYOND THE BREACH

In the face of sophisticated threat actors, a foolproof incident response plan is your best defense.

## Preparation

Identify critical assets, create a documented response policy and ensure all employees know their roles in safeguarding your digital fortress.

## Detection and identification

Continually monitor your entire infrastructure to detect and identify threats before they escalate.

## Containment, Eradication & Recovery

Isolate affected systems, eliminate the root cause of the incident and restore the impacted areas to their normal state.

## Post-incident analysis

Document the lessons learned and implement proactive measures to prevent incident recurrence in the future.

## Continual improvement

Revisit and update your plan regularly to keep it relevant and ensure its effectiveness.
